About Me

I successfully changed several spheres during my career being curious for knowledge and not afraid of trying new paths.

The decision to start learning IT and Front-End in particular is measured and logical. I am good at planning, attentive to details.

Being a person of Result I am nonetheless open-minded and great at teamwork. As a Key Account manager possess extensive experience in negotiations.

Challenging tasks have always been a great incentive for me.

My current career goal is to master Javascript programming skills and to become a valuable software development team member within a year.
